## News Update

The TrendCare team has been working tirelessly to upgrade all our sites with the new upgrade Version 3.4. To date all Singapore sites, Thai sites and NZ sites are upgraded. All Qld Health sites and most private hospitals have been upgraded in Australia. There are only a few sites left to upgrade now in QLD, NSW, VIC, and WA.

If you have not upgraded to the new version please contact the TrendCare office and book your upgrade date.

The response of user sites to the 3.4 upgrade has been extremely positive. The most commended features have been the acuity enhancements with new patient types and additional indicators, added HRM Registers, Health Registers, the new launchpad, the comprehensive graphs and reports on patient specialising, extensive enhancements in efficiency graphing and reporting including casual, agency, overtime and toil hours.
